Mowital®

Discover our bio-based PVB resin solutions!

Sustainability is not just a trend; it is the future. Our latest bio-based PVB resin products offer an environmentally friendly alternative to help you achieve your sustainability goals. Why choose bio-based PVB resin?

> Reduced CO₂ footprint

Sustainable raw materials through ISCC **PLUS-certified** mass balancing

High quality and performance

ISCC PLUS CERTIFICATION - YOUR GUARANTEE FOR GENUINE SUSTAINABILITY

Our bio-based PVB resin products are certified according to the ISCC PLUS standard. This means:

Responsible resource utilization

Verifiable CO₂ reduction

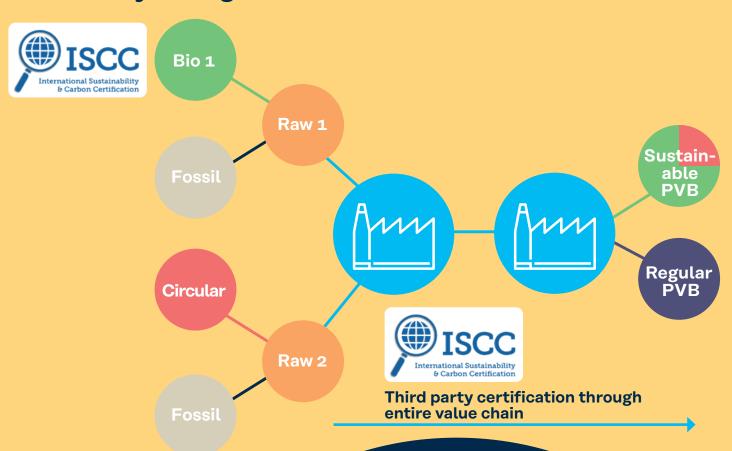

Transparent supply chain with mass balancing

SUSTAINABLE BENEFITS FOR YOUR COMPANY:

- Competitive advantage Meet increasing environmental requirements and customer demands.
- Reduced environmental impact Lower your CO₂ emissions with certified, sustainable products.
- Brand enhancement Position your company as a pioneer in sustainable solutions.

Traceable mass balancing

Traceability through ISCC PLUS certification

Mass balance is the general name for several methods for tracking the input of sustainable materials in production and to gradually shift away from virgin fossil to renewable/recycled raw materials.

All methods rely on the same basic principle: separating renewable and fossil materials in bookkeeping while mixing them in production.

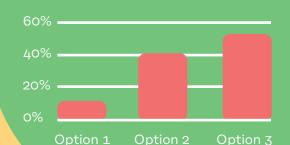

Non mass balancing requires specialized equipment, which is highly integrated in the chemical industry. Therefore, mass balance is the enabler for sustainable products.

Future outlook – If mass balancing is adopted

The climate impact over a 100-year period is 4.17 kg CO₂-eq per kg of MOWITAL®

CO2 reduction in MOWITAL®

Expense increase for MOWITAL®

Option 3
Option 2
Option 1

Advantages of the variants:

Standard -10% CO2 reduction

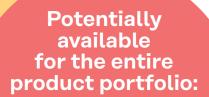

• Introduction to the world of bio-based materials

Premium -40% CO₂ reduction

- Greater sustainability through improved bio-based content
- Optimal balance between performance and environmental benefits
- Suitable for companies with medium-term sustainability goals

High-End -50% CO₂ reduction

- Maximum CO₂ savings and highest sustainability
- High-quality material properties for demanding applications
- Perfect for companies with strong environmental goals and premium requirements
